

IPRAWA INVITATIONAL ENTRY PROGRAM

Purpose

The IPRAWA Invitational Entry Program has been introduced to support competitor participation while maintaining the integrity and standards of the Improved Production category.

This pathway allows current members with compliant 3J vehicles to participate on a limited basis where full category requirements are not currently met.

Program Intent

Provide flexibility for competitors in transition to full compliance.

Maintain strong grid numbers while upholding category standards.

Allow limited participation without compromising championship structure.

This is not intended as an alternative to full compliance, but as a short-term participation option.

Eligibility

Be a current financial member of IPRAWA.

Compete in a logbooked Improved Production (3J) vehicle.

Receive approval from IPRAWA prior to entry.

Conditions of Participation

A maximum of two (2) invitational rounds is permitted per competitor.

Invitational competitors will not be eligible for championship points, trophies or awards.

Slick tyres are strictly prohibited.

All Motorsport Australia safety and event requirements must be met.

Category Integrity

The Improved Production category remains aligned with its technical regulations.

Control tyre competitors are not disadvantaged.

A clear pathway exists for competitors to move toward full compliance.

Approval Process

All invitational entries are subject to IPRAWA review and approval.

Requests are assessed based on alignment with category intent and fairness to competitors.

Approval may be declined where criteria are not met.

Moving Forward

Competitors are encouraged to use this program as a stepping stone toward full compliance.

Ongoing participation will require adherence to all Improved Production regulations.
